Totech Super Dry^R Unveils two new 1% Dry Cabinet models at APEX

World leading manufacturer of ultra low humidity drying and storage cabinets and component handling specialist Totech Super Dry will introduce advanced new 1% RH models at APEX.

Designed to help meet the formidable challenges associated with IPC J-STS-033 for handling of Moisture Sensitive devices, the HXSD Series delivers a host of premium performance features, precision measurement, 24/7 data logging and ergonomic touch screen operator interface.

The SDFA Series combines the high performance features of the HXSD in a configuration that conveniently accepts full feeder trolleys from all Pick and Place manufacturers.
